

Technology, Expertise and Solutions for Asset Managers

We support our clients at every step in their journey to achieve the results they want.

About Accordia Group

Since 2004, our technology consulting team has developed and maintained over a half dozen large fund management solutions. Our solutions cover the full range of asset classes, and support the varying investment strategies of some of the industry's pioneering leaders.

Flexibility to Adapt to Changing Business Requirements

Deliver Operational Efficiencies and

Expertise to Accelerate Time to Value

We bring more than 15 years of industry experience and domain knowledge, together with software expertise and industry best practices. We start generating business value on day one of our relationship with you.

Our exceptional team of engineers and business professionals provides support for a fund's entire production infrastructure, which includes front, middle and back office applications.

We can help you overcome project bottlenecks and deliver high-priority projects in a pinch by adding development capacity on demand.

Our team can run entire projects independently, or seamlessly integrate with your in-house technology team. We offer the flexibility to tailor our development capacity to your business needs.

Flexibility to Adapt to Changing Business Requirements

Deliver Operational Efficiencies and Control Cost

Our typical model involves placing a small number of engineers in-house in order to leverage the talent and experience of a larger group of off-shore engineers. We can work on individual projects with minimal client involvement, or have our team fully integrated with your team's ongoing production support projects.

You design the process you think will work the best for your situation.

Our Expertise

Custom Software Development

Extensive knowledge of financial applications in the areas of: transaction processing, trade capture, reconciliation, position and P&L reporting, valuation and risk for a wide range of products in real time and end of day, performance reporting, and compliance.

System Engineering, TechOps and DevOps

Quality Assurance Services

Data Warehousing and Consolidated Reporting

What Clients Say

The Accordia Group is so effective at delivering fund consulting services because they compete on unique and extensive customer experience that others just can't duplicate.

~COO, hedge fund

Get to Know Our Team

We are a team of 80 industry experts and engineers, in U.S. and European offices, with a strong one-team attitude. We have an enormous amount of experience building financial software for operations, middle office, back office, risk, compliance and investor services.

We are proficient in a wide range of technologies, including Java, and .NET, as well as web-based and cloud-native technologies.

What We Care About

Passion for Work

Our passion makes a difference in our output and commitment to our clients.

Culture of Excellence

We are always looking out for opportunities to innovate and improve.

One-Team Spirit

We share vision and goals with focus on process excellence, engineering excellence and people excellence.
