Global Investing for Family Office

Accordia is delighted to welcome our regular market commentator Mark Tinker to a discussion with Angelo Robles.

Mark brings 35 years of sell side strategy and investment experience to answer critical questions about geopolitics, economics, currencies and investment markets with a view to the second half of 2023 and beyond. Mark turns his attention towards:

- The real cost of money
- Why public markets can take share from alternatives
- Why leverage and illiquidity as investment factors are losing their earnings power
- If the FED models don't work why does the rest of the world copy their actions?
- Does the Biden Modi charm offensive make India a good investment market?
- How will the petrodollar market survive?
- Is China really on its knees or is this a convenient narrative?

Join us to get answers to these questions and much more.
